

**TOP 10 REASONS TO SELECT  
SEELAUS INSTRUMENT COMPANY  
AS YOUR GAS MONITOR CALIBRATION SERVICE**

- 1. You get factory trained and certified technicians.**
- 2. You get a local, qualified company which saves you travel expenses.**
- 3. You get a documentation package with each calibration. We will report 'as found' and 'as left' data which can be used for insurance purposes.**
- 4. You get a 'job will be done right' commitment. If something is wrong, we will let you know for sure even though you might not like it.**
- 5. You get good response time if there should be a problem particularly if you are a service contract customer of Seelaus Instrument Company.**
- 6. You will reduce or eliminate gas monitoring problems as we will keep track of needed sensor replacement situations. What is the cost to you of a false alarm? What is the value to you of detecting a legitimate alarm situation?**
- 7. You will save money on unneeded spare parts. Many times we see customers that are ordering unneeded parts because they are not passing calibrations and they order the incorrect part because they don't know what part they need to order.**
- 8. You save on your own manpower costs because we are very efficient at what we do as we specialize in gas monitor calibrations. Your technicians are usually not as efficient as we are plus they have additional duties. Your gas monitors are an important safety item.**
- 9. You will have peace of mind that your equipment is working properly for employee safety.**
- 10. You will have one of the best service providers in the gas detection industry working on your behalf.**

**Customer references are available.**
